HADEED AHMED

FULL STACK DEVELOPER | GEN AI ENGINEER

hadeeda980@gmail.com | +923054827267 | Portfolio | LinkedIn | GitHub

Summary

Full Stack Developer with expertise in React, Next.js, Redux, and API driven frontend architectures, combined with backend development using Django. I also specialize in AI-powered image and video generation workflows using ComfyUI and related tools. Experienced in building responsive, scalable applications and integrating AI systems into real-world products. Strong focus on clean code, performance, and practical problem-solving.

Education

FAST - National University of Computer and Emerging Sciences *Lahore, Pakistan*
Bachelor's in Computer Science Sept 2021 - Dec 2025
CGPA: *3.13 / 4.0*

Main Coursework: Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence, Applied Machine Learning, MLOps, Generative AI, Digital Image Processing

Professional Experience

Grootcore Systems *Lahore - Remote*
Website Developer *July 2024 - Current*

- Developed responsive and high-performance web applications using React and Next.js.
- Implemented modern UI/UX practices to ensure cross-device compatibility and smooth user experience.
- Integrated REST APIs and third-party services for dynamic data handling.
- Optimized application performance through efficient component design and code splitting.
- Collaborated closely with QA teams to identify, debug, and resolve issues.
- Participated in code reviews and maintained clean, scalable codebases.
- Contributed to feature development and iterative improvements based on client and team feedback.

Codecross *Remote*
Backend Developer *Oct 2025 – February 2026*

- Developed and maintained scalable backend services using Django and Python.
- Designed and optimized database schemas for efficient data storage and retrieval.
- Improved performance through query optimization and efficient data handling techniques.
- Built and secured RESTful APIs for seamless frontend integration.
- Collaborated with frontend developers to ensure smooth and reliable API communication.
- Implemented authentication and authorization mechanisms for enhanced security.
- Debugged and resolved backend issues to ensure system stability and reliability.

Projects

Automated Story to Movie Generator (MVP) | *LLM, Stable Diffusion, AI Video Generation, Next.js, Lora Trainings*

- Led development of an Automated Story to Movie Generator (MVP).
- Built an AI-powered web app that converted text prompts into structured movie scenes.
- Integrated LLMs for story generation and scene structuring.
- Used Stable Diffusion to generate images from scene descriptions.
- Implemented WAN 2.2 Video for converting images into video sequences.
- Designed a multi-stage pipeline for end-to-end content generation.
- Enabled users to input stories, review AI-generated scenes, and customize outputs.

AI-powered Virtual Fashion Store | *Nano Banana, Generative AI, Next.js, Cloud Storage, GPU Utilization*

- Developed an AI-powered Virtual Fashion Store with virtual try-on functionality.
- Enabled users to upload clothing images and visualize them on AI-generated models.
- Implemented image processing and generative AI techniques for realistic outfit rendering.
- Designed an intuitive interface for seamless user interaction and experience.
- Integrated backend services for handling image uploads and processing pipelines.
- Focused on improving visual accuracy, alignment, and fitting of clothes on models.
- Built the system to simulate a real-world online shopping and try-on experience.

Freelancing Platform with AI Chatbot | *Next.js, TailwindCSS, TypeScript, MongoDB, AI Chatbot, Firebase*

- Built a full-stack platform enabling clients to connect with freelancers across multiple services (web, app development, etc.)
- Integrated a real-time AI chatbot to handle user queries and provide instant assistance
- Designed chatbot features for dispute resolution and guided user interactions
- Implemented dynamic UI with smooth user experience and responsive design
- Managed authentication and real-time data handling using Firebase services
- Created scalable backend and database structure for handling users, gigs, and transactions

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, C++
- **AI & Systems:** LLM Integrations and Function Calls, Lora trainings, Machine Learning
- **Backend & DB:** FastAPI, Flask, Django, Node.js, Docker, Cloud Deployment, MongoDB, Firebase, SQL Databases
- **Frontend & Mobile:** Next.js, React, Tailwind CSS, HTML5, CSS3
- **Automation & Integrations:** ComfyUI, n8n
- **Soft Skills:** Problem Solving, Collaboration, Communication, Time Management

Leadership & Community

- **Deputy Head - Infrastructure, SOFTEC (FAST-NUCES),** Led technical event organization and managed infra team.
- **IEEE NUCES Lahore – Treasures** Managed expenses of whole event.

Awards and Honours

- Academic Recognition & Dean List - FAST NUCES (Fall 2022)
- Exceptional Volunteer - SOFTEC 2023
- IEEE Student Member, 2024
