PROJECTS

News API

Developed a React-based news API which shows news based on user preference. It can be helpful as the world is innovating towards digital technology.

Pharmacy Management System

Developed a web-based pharmacy management system using ASP.NET, C#, CSS, Bootstrap, and MySQL. It features two interfaces: an employee portal for managing inventory, orders, and sales reports, and a customer portal for browsing products, and placing orders.

Pseudo Coloring of Image

Developed a project regarding Digital Image Processing by using different Python libraries (Tkinter, Matplotlib, openCV, Numpy). You can map the ranges of gray level to any of the given colors. This flexibility can be valuable in various fields such as medical imaging, remote sensing, and scientific visualization.

Online Food Delivery System

Developed a project using C++ with the art of Multithreading, OOP and Data Structures which manages the order of customers, allocating order to chefs and the delivery of the food. This project include stacks, queues, graphs and shortest path algorithms.
